Features—

WHAT DOES OUR MEDIATION PACKAGE INCLUDE?

- Initial preparation meeting with the mediator (“intake”) for both you and your former spouse (separately) to assess whether your matter is appropriate for mediation, identify the issues to be discussed and assist you to better understand the process.
- A structured process whereby mediation goals are discussed and your matter is progressed in a timely fashion towards the mediation date.
- A cooperative mediation day where you and your former spouse (and your legal representatives, if applicable) meet with the mediator to reach agreements on matters important to both of you.

Benefits—

WHY IS THIS USEFUL TO ME?

- Discussions can include matters big or small and do not have to be limited to issues that are only relevant in law.
- By entering into mediation each party is committing to make a genuine effort to resolve the matter and to act in good faith.
- Reaching agreement at mediation can short-circuit your resolution pathway leading to more timely and cost- effective outcomes for you and your family.
- If you have children, mediation can sometimes include the input of a child expert, who will assist with understanding the needs and best interests of your children (after meeting separately with them, and with you, prior to mediation.)

Results—

WHAT DO I HAVE IN THE END?

- Initial preparation meeting with the mediator (“intake”) for both you and your former spouse (separately) to assess whether your matter is appropriate for mediation, identify the issues to be discussed and assist you to better understand the process.
- A structured process whereby mediation goals are discussed and your matter is progressed in a timely fashion towards the mediation date.
- A cooperative mediation day where you and your former spouse (and your legal representatives, if applicable) meet with the mediator to reach agreements on matters important to both of you.
